

Summary

- Five years' experience developing CMSes using the Drupal framework.
- Academic background in information architecture and user experience design.
- Desire to build solutions where users, web content, business needs, and technology each have an impact on the project.

Technology Proficiencies

General Web Development

- Standards-based, semantic HTML and CSS
- Accessibility for screen readers, text browsers, and mobile devices
- Progressively-enhanced JavaScript (including jQuery and JSON)
- Knowledge of PHP and XML
- Version control using Git and SVN
- Integration with third-party APIs
- LAMP server system administration (CLI, CentOS, Plesk)

Drupal-specific skills

- Defining entities, views, and other elements via functional requirements
- Responsive theme/front-end development
- Custom module development
- Continuous integration workflows via Features and custom modules
- Commerce (Drupal 7) and Ubercart (Drupal 6) experience
